

Glasscraft Decorative Ltd

Manufacturer of Insulated Glass Units

Information Regarding Dangerous Substances Reference, clause 4.6 of EN 14351-1: 2006+A1:2010

Insulating glass units manufactured and supplied by Glasscraft Decorative Ltd for us in the fabrication of windows and doors are regarded as non-toxic. All components used in the manufacturing process are chemically inert when present in the final product – insulating glass units. Insulating Glass Units provided by Glasscraft Decorative Ltd are not considered harmful to health or to the environment and are free from emissions when in normal use.

Glasscraft Decorative Ltd is a responsible supplier who operates a comprehensive Occupational Health and Safety Management system (inclusive of COSHH regulation 2002, amendment 2005)

All raw materials used in the manufacture of insulating glass units at Glasscraft Decorative Ltd are subject to the above regulations. Manufacturing waste is recycled where possible or disposed of in accordance with product waste recommendations or relevant guidelines.

Thermally Insulated Glass Units manufactured by Glasscraft Decorative Ltd supplied for use in the fabrication of windows and doors contribute to the reduction of energy use and CO2 emissions.
