

Information About Glass Weights

Glass Weights

4mm glass → 10kg/m²

6mm glass → 15kg/m²

10mm glass → 25kg/m²

Sealed Unit Weights

(Including spacer bar, desiccant & sealant)

Double Glazed Units

2 × 4mm glass → 20kg/m²

2 × 6mm glass → 30kg/m²

1 × 4mm + 1 × 10mm glass → 35kg/m²

Triple Glazed Units

3 × 4mm glass → 30kg/m²

Sealed Unit Examples

400mm × 1100mm (4mm glass) → 8.8kg

1200mm × 1300mm (4mm glass) → 31.2kg

1300mm × 1300mm (6mm glass) → 50.7kg

Information About Glass Measurements

Minimum Size:

Toughened glass must be at least 100mm x 270mm. Smaller sizes will be made in annealed or laminated glass.

Non-Standard Products:

(longer lead time & higher price) → Check before ordering.

- 1500mm or larger (both directions).
- Over 2.5m².
- Over 80kg.

Glass Thickness:

- 1300mm or larger (both directions) → Use 6mm glass instead of 4mm. (prevents flexing).
- 2.5m² or larger → Must be 6mm glass.

Patterned Glass:

Stock sheets are 1320mm x 2140mm. Larger sizes available only in satin glass.

Refer to the table on next page for unit size compatibility. Always verify glazing sizes or contact us for assistance.

Please use this table as a guide to which unit sizes can be made in which glass.
(Measurements in mm).

4mm glass

Annealed or laminated only
(too small to toughen)

Must be 6mm glass

Above standard size. Price on
application only.
